WATER

sensorLink Water

Monitor water usage anyware, anytime

This **sensorLink** device is used to monitor the water usage of a pulsed output connect water meter remotely. The water sensor counts the pulses and sends it daily to the **sensorWorx** web platform. The sensor can be configured to work with various types of mechanical meters.

SENSOR FEATURES	SYSTEM FEATURES	SENSOR PARAMETERS
• 3 years' battery life	• Low Battery Indicator	• Connect various types of meters
• Non-volatile memory	• Configuration Setup Software	
• Serial Interface	• Platform Access Included	• Sends update Daily
• Thingstream© Ready	• IP56 Enclosure	• 3 x AA Alkaline batteries

Applications include:

- Complexes/Apartments
- Schools
- Hotels
- Lodges

Technical Specifications:

Operating Temperature
-40°C - +85°C

GSM Technology
2G(GSM/GPRS)

IP56 Enclosure Dimensions	
Height(mm)	31
Length(mm)	112
Width(mm)	63
